Volume 1 Issue 1: Paper Cuts

**Paper Cuts:  
His Head Pounded Like a Heart  
Enlarge This Image**

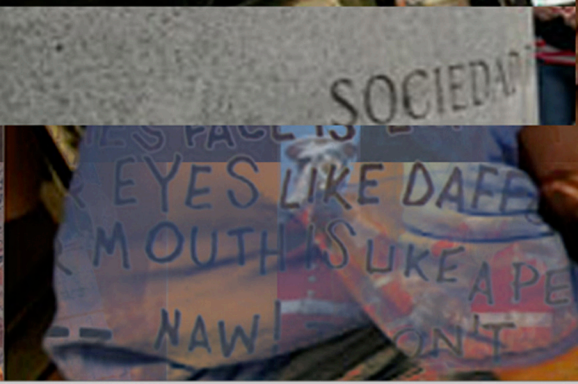

**In a Frantic Day, the artist was, maybe,  
a little nervous. Who would not be?  
It was a few days before his gallery  
show.**

**The attacks were the latest in a series of bombings that have hit crowded areas in recent months. The makeshift bombs rely on easily obtained materials for explosives and loose metal bits like screws and nails to inflict damage.**

**A bomb squad moved what appeared to be an unexploded bomb into a round safety chamber. Five unsophisticated bombs went off in crowded shopping areas.**

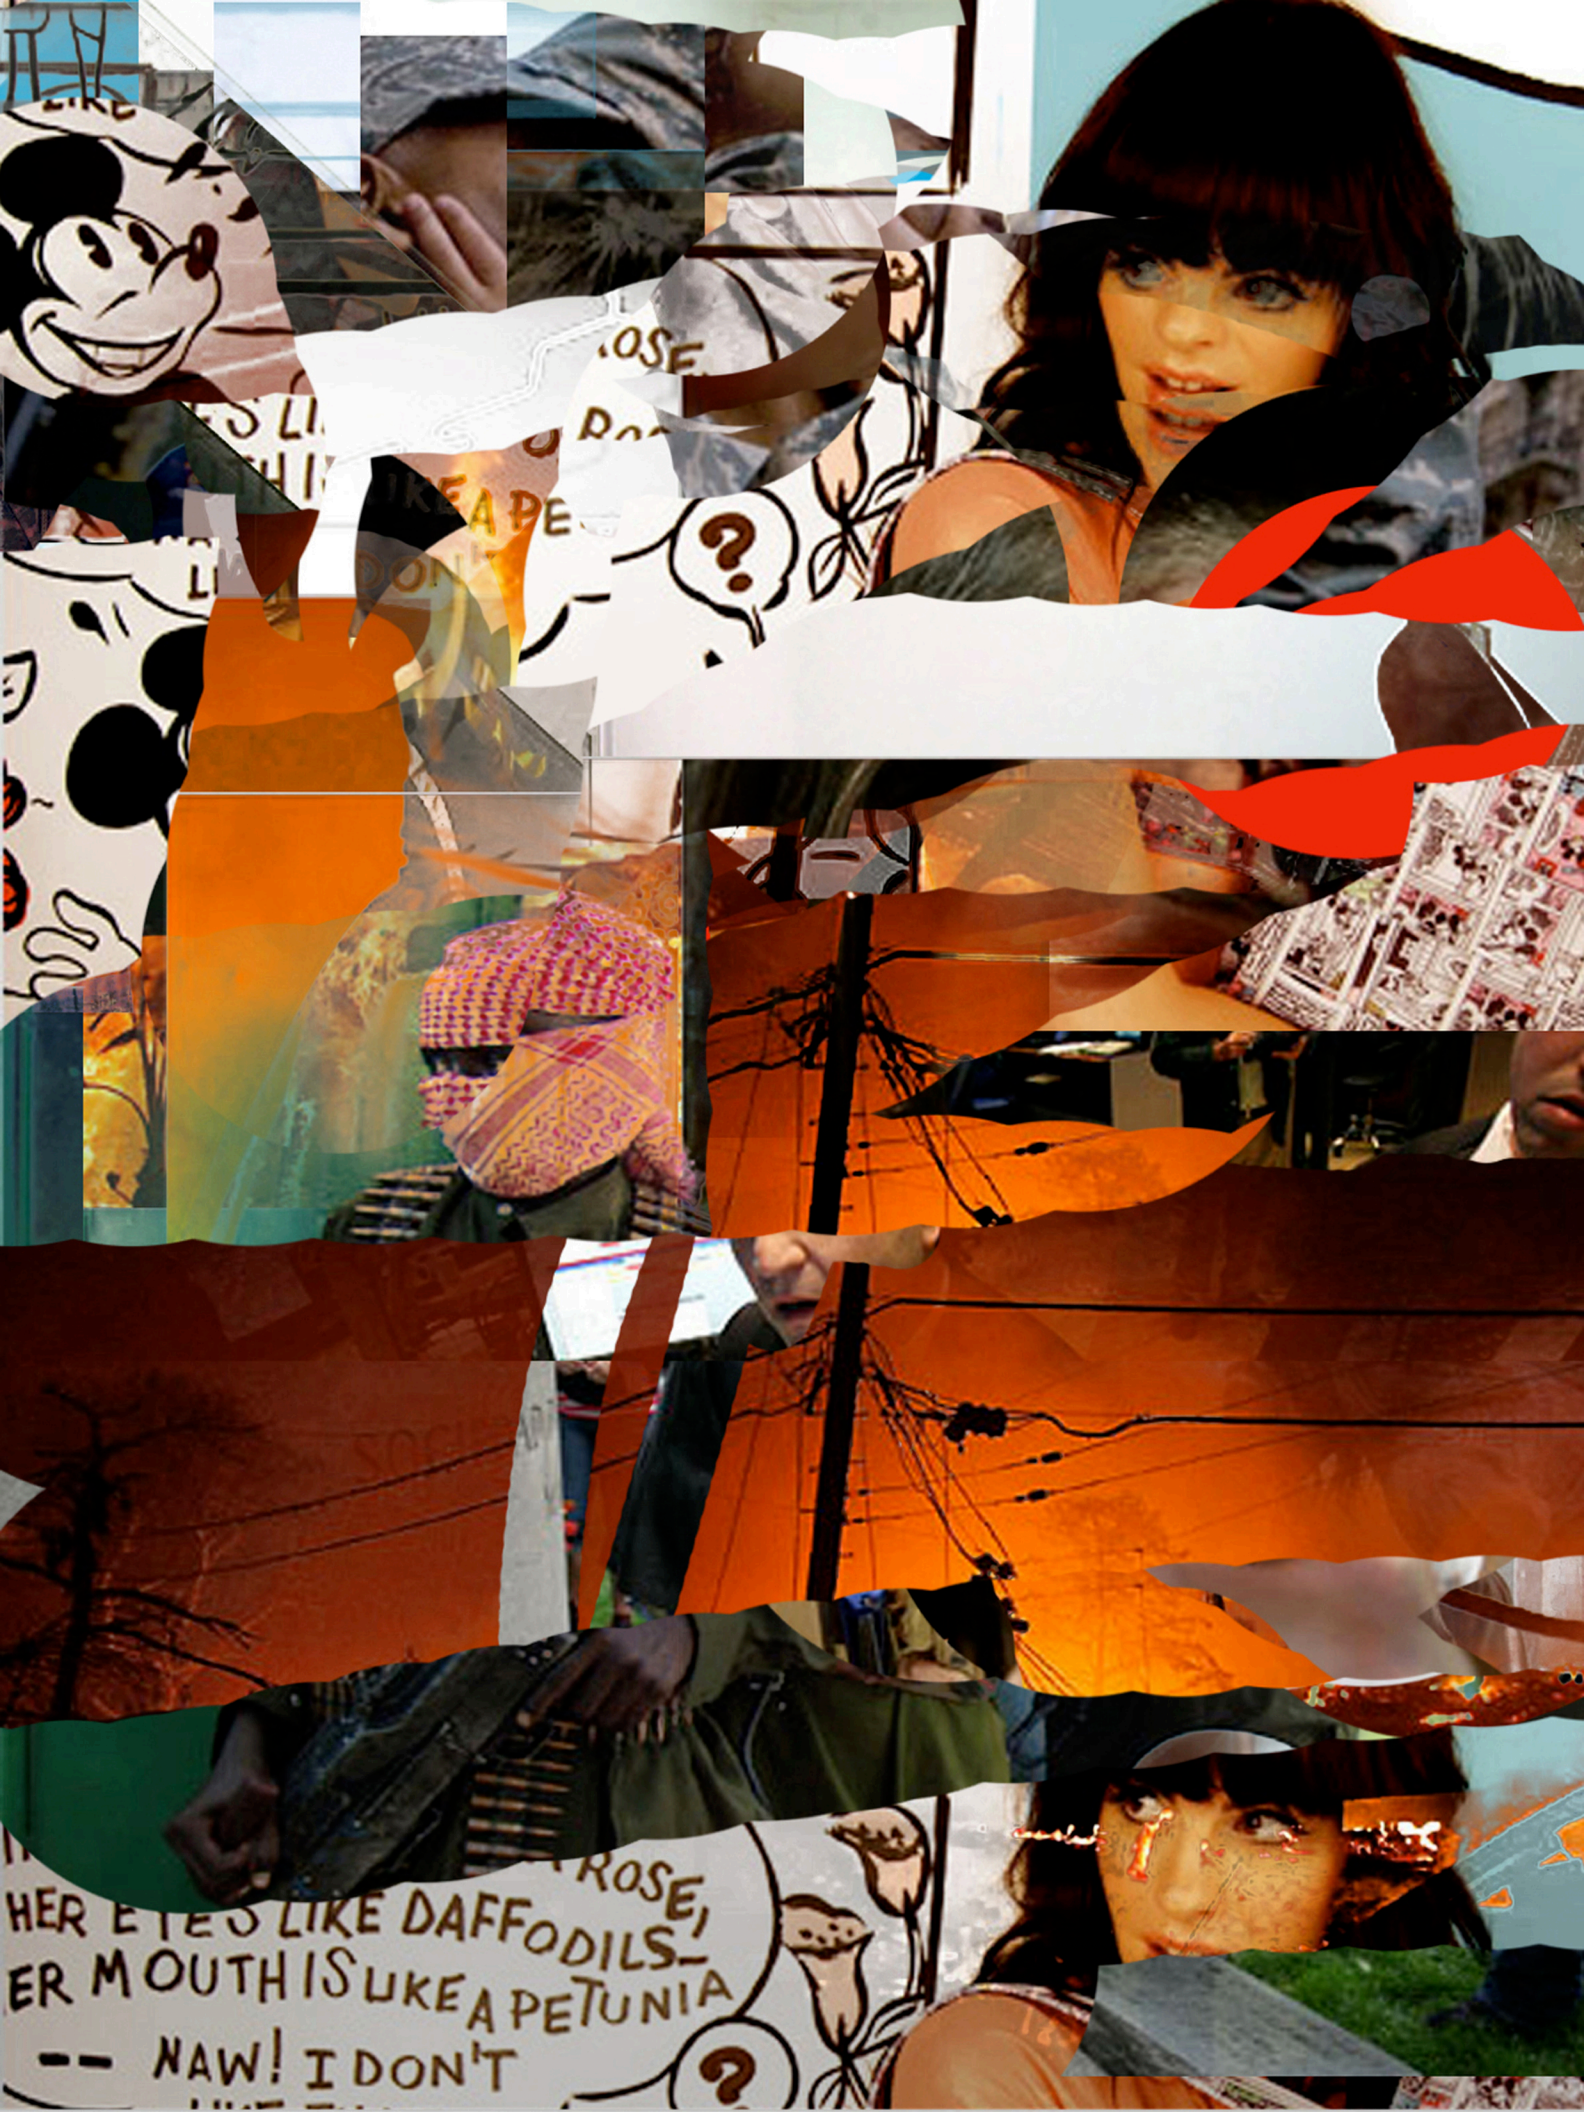

**A group claimed responsibility for the blasts in e-mail messages sent to local news outlets minutes before the explosions, and even as some were happening.**

**They did not spell out how the deal would work, the details of the agreement would be released at a signing ceremony.**

**“were really able to impose our will,”  
“that’s the mark of a champion”  
he added.**

**Personality is more complicated than height, of course. It's affected by not just the physical but also the social stresses, rules, hierarchies, and gender roles.**

**"I never had any kind of program or anything- I did these collages for amusement, without thinking anyone else would be interested".**

**The police are studying video from closed-circuit television cameras.**

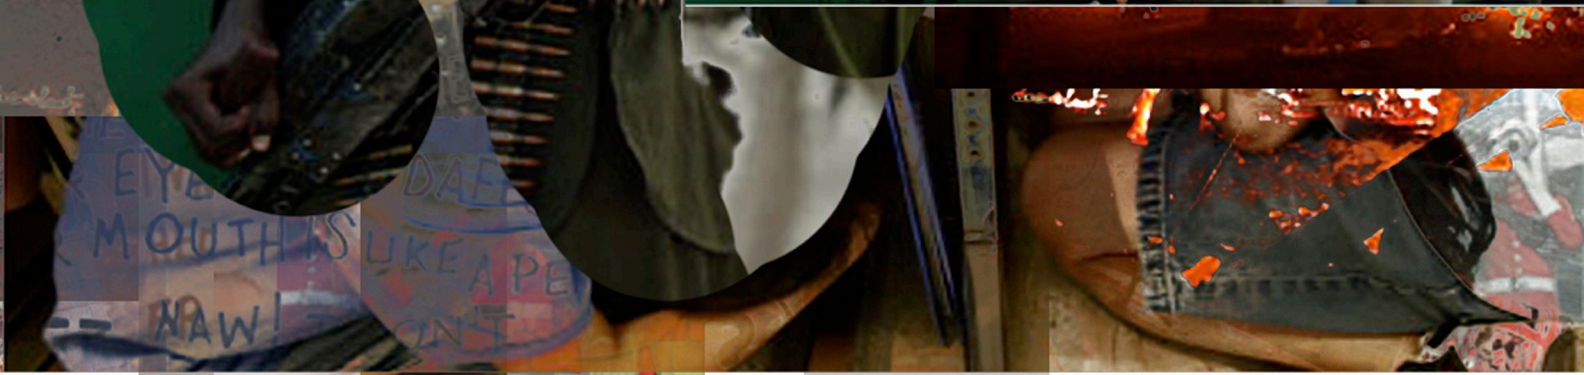

NAW! I DON'T  
LIKE THAT

**Collage is the ideal art, not just because it can incorporate words, but because it can be done on a desk.**

**You lay out your paper, glue and scissors, and you're set to go.**

**What pictures exactly will be included, officials described an arrangement that seemed to bring the stability needed to rebuild the country's ruined everything. What may be forgotten is the fourth quarter against a woeful team that was booed occasionally by its home fans. It was the place to be, what with its air of new-generation chic and poets doing strange things with language. On average, women are more cooperative, nurturing, cautious and emotionally responsive. Men tend to be more competitive, assertive, reckless and emotionally flat. Clear differences appear in early childhood and never disappear.**

**Skip to next paragraph.**

**Skip to the next paragraph.

**There is a hint of a narrative,  
though what the story might  
be is hard to say.**

**The artist, famously tight-lipped  
about meaning, doesn't offer  
explications to cede some authority.**

**“I lost those for a long time.”**

**“Quite a few others got thrown out.”**

**Leaders around the world condemned the blasts.**

**“There was no place to paint, so I stopped.”**

**For him the experience was, from the start, “pretty hairy.”**

**The police detained several suspects in the bombings.**

**Join the discussion.**

**Collages exhibited, more photos, multimedia,  
related. Leaders would gather. Witness  
opposition- fiercely resisted.**

ANNIE'S FACE IS LIKE A ROSE  
HER EYES LIKE DAFFODILS  
MOUTH IS LIKE A P  
W T DON
